Extrinsic bursts: handler latency and cores over time
3-P victim on threads 18-20, SN/SS aggressor bursts 10 s on / 10 s off (shaded), mitigation enabled at 80 s; sweep A trial 2
no mitigation
harvesting (HC, enabled at 80 s)
replication: 3 replicas, other cores of node-4
replication: 3 replicas on node-3
victim instance, 1 s count-weighted
handler p90 (us)
consumed by victim + replicas, per second
cores
time (s)
no mitigation
harvesting (HC)
replication
HC: cores reserved for the victim but idle (3 - lent - used)
HC: total cores taken = used (solid) + reserved idle (dashed)
mitigation enabled (80 s)
aggressor burst
