Intrinsic steady: service latency and cores over time
1-P victim on thread 18, 800 rps + 10200 rps extra from t = 20 s (shaded), no aggressors, mitigation enabled at 80 s
no mitigation
harvesting (HC, enabled at 80 s)
replication: 1 replica, other cores of node-4
replication: 1 replica on node-3
service total p50 (ms, log)
pooled over victim + replicas, 1 s count-weighted
consumed by victim + replicas, per second
cores
time (s)
no mitigation
harvesting (HC)
replication
HC: cores reserved for the victim but idle (3 - lent - used)
HC: total cores taken = used (solid) + reserved idle (dashed)
mitigation enabled (80 s)
11000 rps offered
